

Top 10 Tips for Productive Research and Teaching

Adjo Amekudzi, Ph.D.

School of Civil & Environmental Engineering

PRODUCTIVE RESEARCH

1. Learn something new everyday
2. Figure out what works for you and do it
3. Understand what you can control/not control
4. Work with people you trust
5. Be willing to build knowledge communities that are not limited by geography

GOOD TEACHING

1. Educate the whole person
2. Have and communicate clear expectations
3. Be fair and consistent
4. Teach to different types/levels of learners
5. Connect course content with real world/research
